

USG Energy Drilling Services

USG Energy is a specialist service provider, providing personnel for drilling, production and engineering activities, as well as providing medical back-up in exploration and exploitation of Oil and Gas reserves. The Unit Drilling provides experienced professionals to drilling contractors and drilling services companies.

Personnel Services

USG Energy's Unit Drilling provides the industry with all positions necessary in the drilling process of Oil and Gas:

- Deck crew: roustabouts, crane operators, (assistant) barge engineers
- Drilling crew: roughnecks, derrickmen, (assistant)drillers, toolpushers
- Mechanical and Electrical crew: motormen, mechanics, electricians
- Maintenance crew: paint supervisors, painters
- Supporting positions: material coordinators, medics, radio operators

Activities of the Unit Drilling extend all over the world. Our main working area is the North Sea and the Middle East. Drilling activities of our clients take place both onshore and offshore.

USG Energy Drilling Services

- The services of USG Energy's Unit Drilling consist of providing complete crews, parts there of and individual positions. It could involve a core crew for an unspecified time, as well as personnel on a temporary basis during illness, holidays and extra work. USG Energy is capable of fulfilling positions at all levels for a drilling installation. Clients may use the separate services of the Unit Drilling or the Full Service Concept, where amongst others things we can take over logistics and planning of personnel.
- Regarding progress of work, operational personnel of the Unit Drilling will have frequent contact with the professionals provided, both office based as well as on drilling installations.
- Like our clients, USG Energy considers quality and safety to be crucial during all activities. Education and training programs for all personnel is considered to be a minimum to all standards stated by the drilling industry.
- Payroll-service is possible, where USG Energy will hire professionals on the client's request.
- USG Energy will provide personnel with all required personal protection equipment (PPE).

USG Energy is also a member of the International Association of Drilling Contractors (IADC).

Leading partner in the Drilling Industry

With years of experience and a reputation within the Drilling Industry, USG Energy has developed into much more than just a supplier of manpower. To clients our skilled and experienced personnel make the Unit Drilling a recognised partner and a source of information. This applies to Safety Laws and Regulations in addition to training and legal affairs in the sector. The fact that a major group of clients and professionals still work with USG Energy since its establishment in 1989 signifies the confidence in our service.

Intake and career perspectives of new drilling professionals

Well-educated, experienced and motivated personnel are the key elements to success for USG Energy. Considering the growing market and ageing of current members of staff in the Oil and Gas Industry, it is of significance to the sector to use the potential of its personnel and to hold on to knowledge and expertise. Through traineeships, the Unit Drilling in co-operation with its clients facilitates the necessary intake and education of new people in the industry. By means of specialised training and other secondary working conditions we offer both existing and new personnel within the industry developing opportunities. In addition we will carefully attune the educational background and experience of the professionals to the wishes and criteria of the client.

USG Energy: well trained, experienced and motivated personnel as key to success in the Oil and Gas Industry.
